(1)

Pour le déploiement, assurez-vous que l'ordinateur est connecté au réseau et dispose de la batterie.

Après avoir allumé la machine, appuyez immédiatement sur la touche F12.

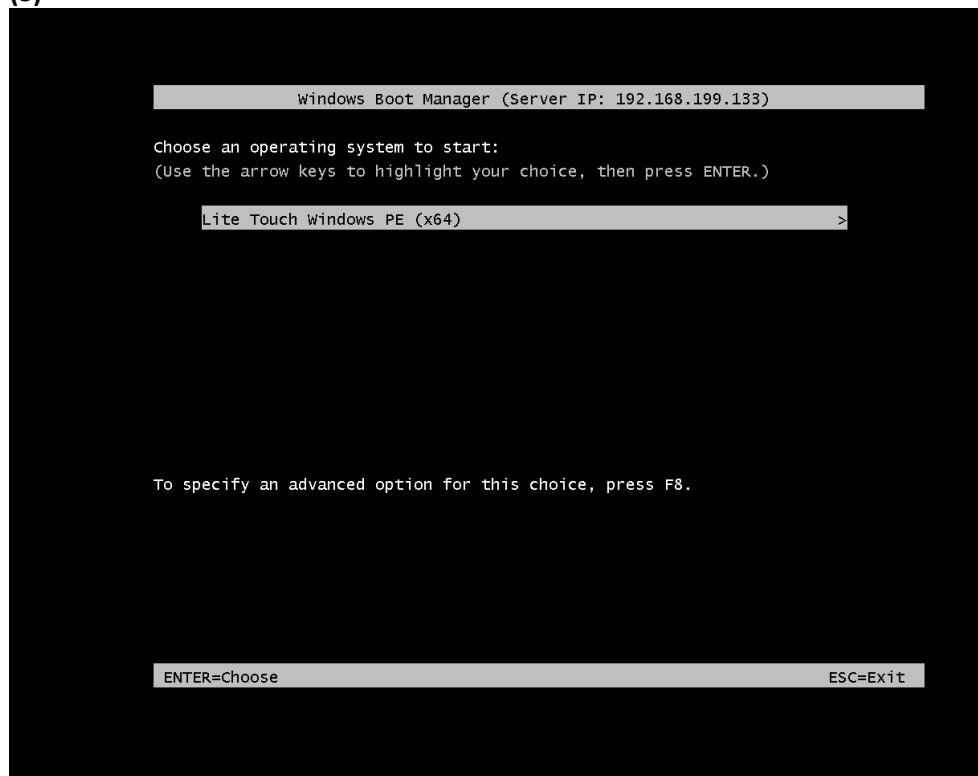

(2)

(2)

Appuyez sur la touche Entrée.

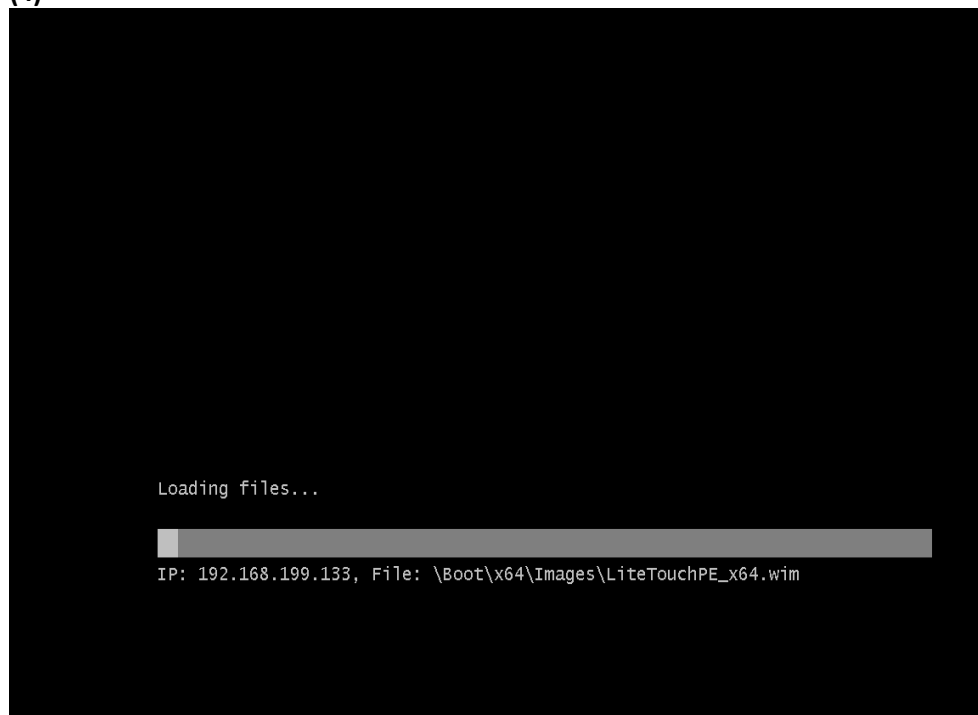

(3)

(3)

Appuyez sur
la touche
Entrée.

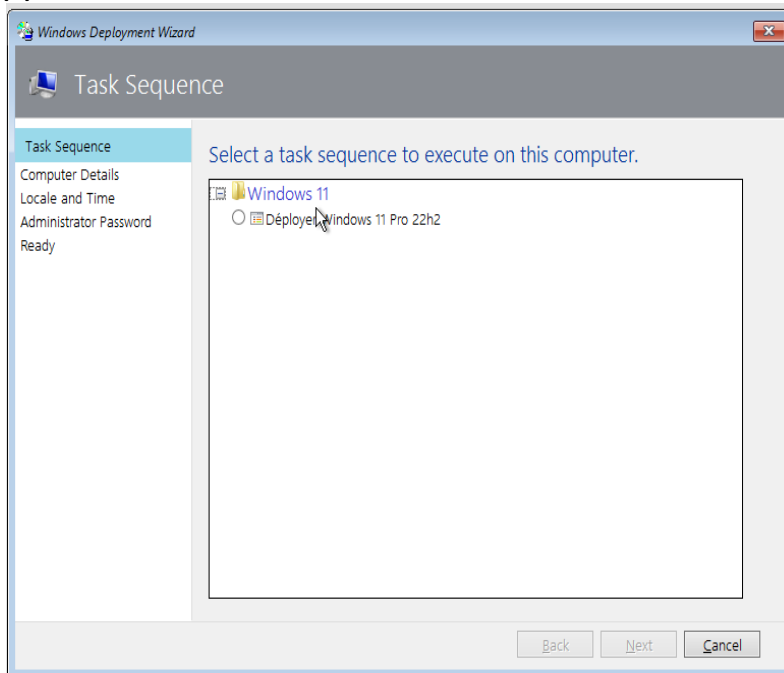

(4)

(4)

Patientez

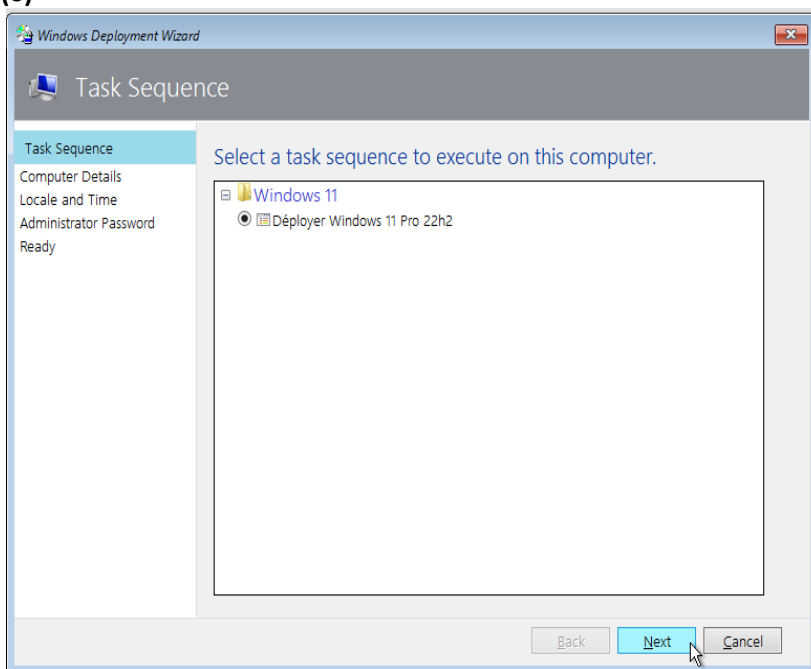

(5)

(5)

Choisissez l'option "Déployer Windows 11".

(6)

(6)

Appuyez sur "Suivant" ("Next").

(7)

The screenshot shows the 'Computer Details' step of the Windows Deployment Wizard. The left sidebar lists the task sequence steps: Task Sequence, Computer Details (selected), Move Data and Settings, User Data (Restore), Locale and Time, Administrator Password, BitLocker, and Ready. The main area is titled 'Computer Details' and contains the following fields and options:

- Computer name:** FRBRDWLT0001
- Join a domain:** (selected)
 - Domain to join:** assureo.dom
 - Organizational Unit:** OU=Provisioning,DC=assureo,DC=dom
 - User Name:** cds-mdt
 - Password:** (masked with dots)
 - Domain:** assureo
- Join a workgroup:** (unselected)
 - Workgroup:** (empty field)

At the bottom right, there are three buttons: 'Back', 'Next' (highlighted with a mouse cursor), and 'Cancel'.

(7)

Saisissez le nom de l'ordinateur conformément à la convention de l'entreprise pour les noms, et n'oubliez pas d'étiqueter la machine avec son nom. Ensuite, appuyez sur « Suivant » ("Next").

(9)

The screenshot shows the 'Move Data and Settings' step of the Windows Deployment Wizard. The left sidebar lists the task sequence steps: Task Sequence, Computer Details, Move Data and Settings (selected), User Data (Restore), Locale and Time, Administrator Password, BitLocker, and Ready. The main area is titled 'Move Data and Settings' and contains the following options:

- Move data and settings from a previous version of Windows?**
 - Do not move user data and settings.** (selected)
 - Install a new operating system without retaining any data or settings from any existing operating systems.
 - ☐ Keep existing partitions (do not format or partition)
 - Move user data and settings.** (unselected)
 - Capture all the user data and settings from an existing operating system on the computer and restore them into the new operating system.

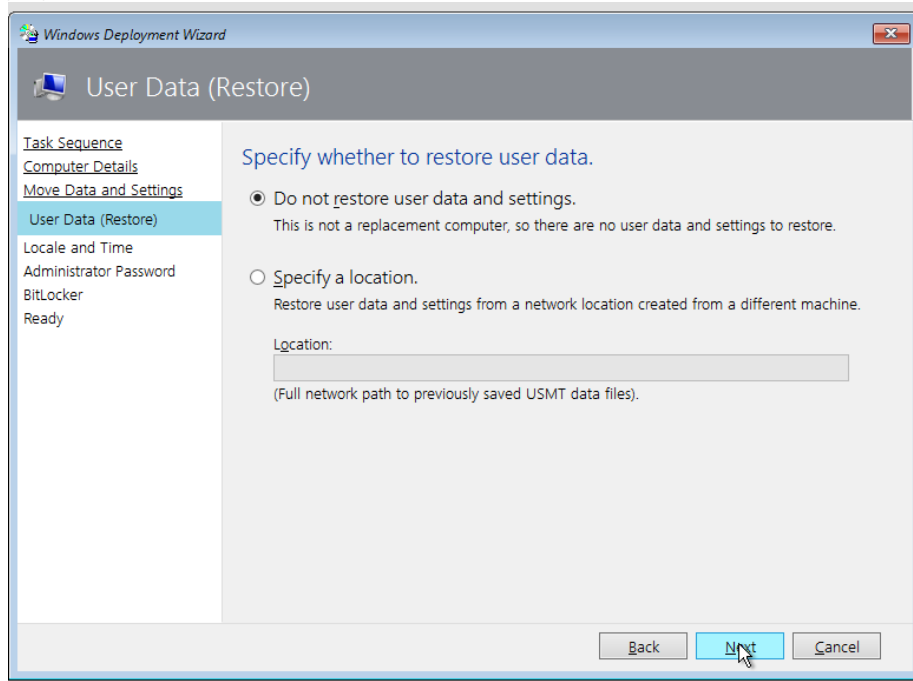

A green message box at the bottom states: "A supported previous version of Windows was not found on this computer. Data and settings cannot be restored."

At the bottom right, there are three buttons: 'Back', 'Next' (highlighted with a mouse cursor), and 'Cancel'.

(9)

Cliquez sur "Suivant" ("Next").

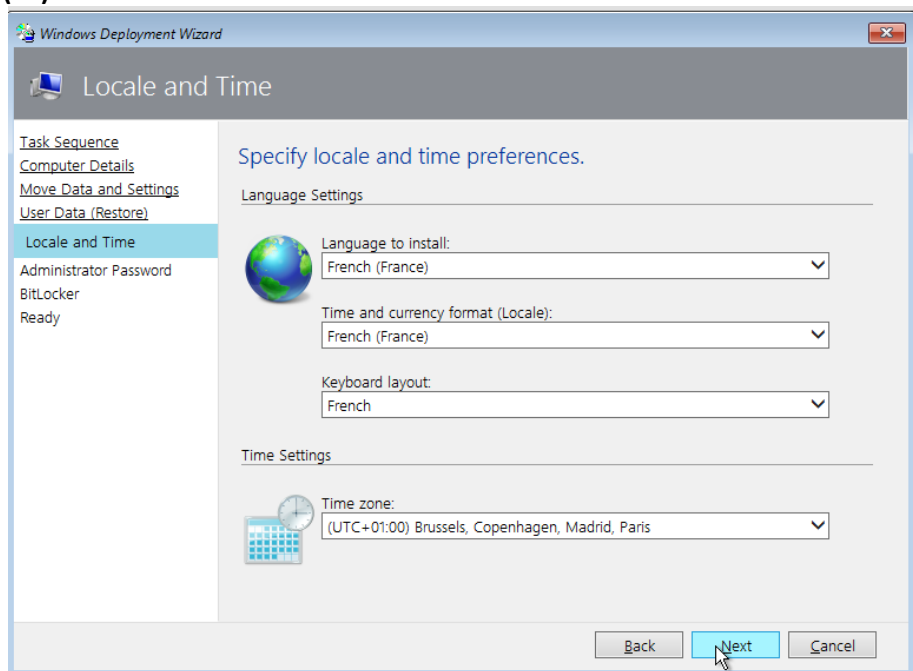

(10)

(10)

Cliquez sur
